

Pilgangoora Lithium-Tantalum Project

Mineral Resource and Ore Reserve Statement - SAMPLE

SAMPLE - illustrative figures for software testing; not an official ASX/JORC disclosure.

1. Introduction

The Pilgangoora Project is located in the Pilbara region of Western Australia, approximately 120 km south of Port Hedland. This statement has been prepared in accordance with the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (the JORC Code).

2. Geology

Mineralisation is hosted in swarms of spodumene-bearing pegmatite dykes intruding greenstone sequences.

3. Mineral Resource Estimate

The Mineral Resource is reported above a cut-off grade of 0.2% Li₂O and is inclusive of Ore Reserves.

Table 1: Pilgangoora Mineral Resource Estimate (JORC 2012)

Category	Tonnes (Mt)	Li ₂ O (%)	Ta ₂ O ₅ (ppm)	Contained Li ₂ O (kt)
Measured	22.1	1.31	120	290
Indicated	251.6	1.18	105	2,969
Inferred	140.3	1.05	98	1,473
Total	414.0	1.14	103	4,732

Note: totals may not sum due to rounding. Contained Li₂O = Tonnes x Li₂O grade.

4. Ore Reserve Estimate

Table 2: Pilgangoora Ore Reserve (JORC 2012)

Category	Tonnes (Mt)	Li ₂ O (%)	Contained Li ₂ O (kt)
Proved	18.0	1.30	234
Probable	196.4	1.20	2,357
Total	214.4	1.21	2,591
